RE: Sole Source of the 24<sup>®</sup> Game/First In Math<sup>®</sup> Online Program

The above-referenced program and materials are developed and marketed by Suntex International, Inc. Suntex, the Sole Source vendor, holds all copyrights and trademarks for these educational materials.

The 24<sup>®</sup> Game and the *First In Math Online Program* support national education objectives by preparing students for a future requiring literacy in mathematics, science and technology. They give students the tools to succeed -- fluency with fundamental math facts and operations, enhanced mental math, problem solving, pattern sensing, critical thinking, reasoning, number sense and communication skills -- laying the foundation for student achievement in higher-level math coursework.

Through game play, students rapidly acquire critical skills. Games are designed to introduce math skills on a gradient. Beginning with the most basic challenges in the "Add Only" edition where students perform a single-step operation, students move along a continuum of math, toward complex multi-step algebraic problem solving.

The games and programs have been successfully used by school districts in New York, California, Pennsylvania and states throughout the US to add excitement and challenge to the basic math curriculum while increasing student enthusiasm for, and confidence in, mathematics.

Purchase of the 24<sup>®</sup> Game materials (customized yard signs, badges, wristbands, t-shirts), or the professional development required for teachers to implement these programs in their classrooms, must be done through Suntex International. Suntex International is the Sole Source for these products and programs.
