Full Environmental Assessment Form Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Sponsor Information.

Name of Action or Project: ADDITIONS & ALTERATIONS, KAHLIL GIBRAN PUBLIC SCHOOL 28			
Project Location (describe, and attach a general location map):			
18 ROSEDALE ROAD, YONKERS, NEW YORK			
Brief Description of Proposed Action (include purpose or need):			
RENOVATION OF PORTIONS OF THE EXISTING BUILDING AND A 13,210 SF (FOOTPRI WILL BE REMOVED AND REPLACED WITH AN ASPHALT PLAY AREA. THE MANOR DR EXPANDED WITH PARKING ADDED.	NT) ADDITION. A TEMPORARY C IVE ACCESS TO THE SITE WILL E	LASSROOM BUILDING BE REALIGNED AND	
THE PROJECT HAS BEEN IDENTIFIED AS A SEQR UNLISTED ACTION DUE TO THE PR $617.5(c)(10)$] AND THE FACILITY BEING LESS THAN 240,000 SF [6NYCRR $617.4(b)(6)(vi)$		10,000 SF [6NYCRR	
Name of Applicant/Sponsor:	Telephone:		
YONKERS PUBLIC SCHOOLS	E-Mail:		
Address: ONE LARKIN CENTER			
City/PO: YONKERS	State: NY	Zip Code: 10701	
Project Contact (if not same as sponsor; give name and title/role):	Telephone: 914 376 8008		
JOHN CARR, EXEC. DIRECTOR OF SCHOOL FACILITIES	E-Mail: jcarr@yonkerspublicschools.org		
Address: c/o YONKERS PUBLIC SCHOOLS			
City/PO:	State:	Zip Code:	
Property Owner (if not same as sponsor):	Telephone:		
	E-Mail:		
Address:			
City/PO:	State:	Zip Code:	

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship.	("Funding"	'includes grants, loa	ans, tax relief,	and any othe	er forms	of financial
assistance.)						

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Council, Town Board,	Yonkers Department of Public Works; Yonkers Board of Education	TBD
b. City, Town or Village ☐Yes ☑No Planning Board or Commission		
c. City Council, Town or ☐Yes ☑No Village Zoning Board of Appeals		
d. Other local agencies □Yes ☑No		
e. County agencies □Yes ☑No		
f. Regional agencies □Yes ☑No		
g. State agencies	New York State Education Department	TBD
h. Federal agencies □Yes ☑No		
i. Coastal Resources.<i>i</i>. Is the project site within a Coastal Area, or	or the waterfront area of a Designated Inland W	Vaterway? □Yes ☑No
<i>ii</i> . Is the project site located in a community <i>iii</i> . Is the project site within a Coastal Erosior	with an approved Local Waterfront Revitaliza Hazard Area?	tion Program? □ Yes No □ Yes No

C. Planning and Zoning

C.1. Planning and zoning actions.	
 Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? If Yes, complete sections C, F and G. If No, proceed to question C.2 and complete all remaining sections and questions in Part 1 	□ Yes 2 No
C.2. Adopted land use plans.	
a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located?	✓Yes□No
If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located?	□Yes∎No
b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?)If Yes, identify the plan(s):	□Yes∎No
 c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? If Yes, identify the plan(s): 	∐Yes ⊠ No

C.3. Zoning	
a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. If Yes, what is the zoning classification(s) including any applicable overlay district? 	✓ Yes No
b. Is the use permitted or allowed by a special or conditional use permit?	☑ Yes ☐ No
 c. Is a zoning change requested as part of the proposed action? If Yes, <i>i</i>. What is the proposed new zoning for the site?	☐ Yes 2 No
C.4. Existing community services.	
a. In what school district is the project site located? YONKERS PUBLIC SCHOOLS	
b. What police or other public protection forces serve the project site? <u>CITY OF YONKERS POLICE DEPARTMENT</u>	
c. Which fire protection and emergency medical services serve the project site? <u>CITY OF YONKERS FIRE DEPARTMENT</u>	
d. What parks serve the project site? <u>CITY OF YONKERS DEPARTMENT OF PARKS, RECREATION, AND CONSERVATION.</u>	
D. Project Details	
D.1. Proposed and Potential Development	

D.1. Proposed and Potential Development	
a. What is the general nature of the proposed action (e.g., residential, ind components)? EDUCATIONAL	lustrial, commercial, recreational; if mixed, include all
b. a. Total acreage of the site of the proposed action?	<u>5.95</u> acres
b. Total acreage to be physically disturbed?	approx. 2.86 acres
c. Total acreage (project site and any contiguous properties) owned	
or controlled by the applicant or project sponsor?	<u>5.95</u> acres
c. Is the proposed action an expansion of an existing project or use?	☑ Yes□ No
<i>i</i> . If Yes, what is the approximate percentage of the proposed expansion	
square feet)? % 31 Units:	BLDG SF
d. Is the proposed action a subdivision, or does it include a subdivision?	□Yes ∠ No
If Yes,	
<i>i</i> . Purpose or type of subdivision? (e.g., residential, industrial, commer-	cial; if mixed, specify types)
<i>ii.</i> Is a cluster/conservation layout proposed?	□Yes □No
<i>iii.</i> Number of lots proposed? <i>iv.</i> Minimum and maximum proposed lot sizes? Minimum	Maximum
e. Will proposed action be constructed in multiple phases?	☐ Yes Z No
<i>i</i> . If No, anticipated period of construction:	$\underline{12}$ months
<i>ii.</i> If Yes:	
• Total number of phases anticipated	
• Anticipated commencement date of phase 1 (including demolit	
• Anticipated completion date of final phase	monthyear
Generally describe connections or relationships among phases, determine timing or duration of future phases:	

	ct include new resid				☐ Yes No

<i>ii.</i> Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placeme alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in squ	
<i>iii.</i> Will proposed action cause or result in disturbance to bottom sediments? If Yes, describe:	□ Yes □ No
iv. Will proposed action cause or result in the destruction or removal of aquatic vegetation?	☐ Yes ☐ No
 If Yes: acres of aquatic vegetation proposed to be removed:	
 acres of aquatic vegetation proposed to be removed. expected acreage of aquatic vegetation remaining after project completion: 	
 purpose of proposed removal (e.g. beach clearing, invasive species control, boat access): 	
 proposed method of plant removal: if a barrier of the second second	
 if chemical/herbicide treatment will be used, specify product(s):	
c. Will the proposed action use, or create a new demand for water?	✓ Yes □No
If Yes:	
<i>i</i> . Total anticipated water usage/demand per day: 4,620 gallons/day	
<i>ii.</i> Will the proposed action obtain water from an existing public water supply?	∠ Yes □ No
If Yes: Name of district or service area: YONKERS	
 Name of district or service area: <u>YONKERS</u> Does the existing public water supply have capacity to serve the proposal? 	✓ Yes No
 Is the project site in the existing district? 	\checkmark Yes \square No
Is expansion of the district needed?	$\Box \operatorname{Yes} \square \operatorname{No}$
 Do existing lines serve the project site? 	\checkmark Yes \square No
<i>iii.</i> Will line extension within an existing district be necessary to supply the project? If Yes:	Yes No
Describe extensions or capacity expansions proposed to serve this project:	
Source(s) of supply for the district:	
<i>iv.</i> Is a new water supply district or service area proposed to be formed to serve the project site? If, Yes:	☐ Yes ∠ No
Applicant/sponsor for new district:	
Date application submitted or anticipated:	
v. If a public water supply will not be used, describe plans to provide water supply for the project:	
<i>vi</i> . If water supply will be from wells (public or private), maximum pumping capacity: gallons/min	ute.
d. Will the proposed action generate liquid wastes?	✓ Yes □No
If Yes: <i>i</i> . Total anticipated liquid waste generation per day:4,620 gallons/day	
<i>ii.</i> Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all	components and
approximate volumes or proportions of each):	
SANITARY WASTE WATER	
<i>iii.</i> Will the proposed action use any existing public wastewater treatment facilities? If Yes:	✔ Yes □No
Name of wastewater treatment plant to be used: <u>YONKERS WASTEWATER TREATMENT PLANT</u>	
Name of district: <u>YONKERS</u>	
• Does the existing wastewater treatment plant have capacity to serve the project?	✓ Yes □No
• Is the project site in the existing district?	✔ Yes □No
• Is expansion of the district needed?	☐ Yes ∠ No

• Do existing sewer lines serve the project site?	✓ Yes □ No
• Will line extension within an existing district be necessary to serve the project?	Yes No
If Yes:	
 Describe extensions or capacity expansions proposed to serve this project:	
• Describe extensions of capacity expansions proposed to serve this project.	
<i>iv.</i> Will a new wastewater (sewage) treatment district be formed to serve the project site?	☐ Yes 2 No
If Yes:	
Applicant/sponsor for new district:	
Date application submitted or anticipated:	
What is the receiving water for the wastewater discharge?	
<i>v</i> . If public facilities will not be used, describe plans to provide wastewater treatment for the project, including spe	cifving proposed
receiving water (name and classification if surface discharge, or describe subsurface disposal plans):	enying proposed
receiving water (name and classification in surface discharge, of describe subsurface disposal plans).	
vi. Describe any plans or designs to capture, recycle or reuse liquid waste:	
e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point	∠ Yes N o
sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point	
source (i.e. sheet flow) during construction or post construction?	
If Yes:	
<i>i</i> . How much impervious surface will the project create in relation to total size of project parcel?	
Square feet or1.68 acres (impervious surface) (APPROX. NET INCREASE)	
Square feet or <u>5.95</u> acres (parcel size)	
<i>ii.</i> Describe types of new point sources.POINT SOURCES WILL BE STORM PIPING CONNECTIONS TO THE EXISTING M DRAINAGE SYSTEM AND PROPOSED ONSITE INFILTRATION PRACTICES	
<i>iii.</i> Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent	
groundwater, on-site surface water or off-site surface waters)?	properties,
CONNECTIONS TO THE EXISTING MUNICIPAL STORM DRAINAGE SYSTEM AND PROPOSED ONSITE INFILTRATION	PRACTICES
If to surface waters, identify receiving water bodies or wetlands:	
• Will stormwater runoff flow to adjacent properties?	Yes No
<i>iv.</i> Does proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater?	✓ Yes 🗆 No
f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel	☐Yes ☑No
combustion, waste incineration, or other processes or operations?	
If Yes, identify:	
<i>i</i> . Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)	
ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)	
iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)	
g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit,	□Yes ≥ No
or Federal Clean Air Act Title IV or Title V Permit?	
If Yes:	
<i>i</i> . Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet	□Yes□No
ambient air quality standards for all or some parts of the year)	
<i>ii.</i> In addition to emissions as calculated in the application, the project will generate:	
•Tons/year (short tons) of Carbon Dioxide (CO ₂)	
• Tons/year (short tons) of Nitrous Oxide (N ₂ O)	
 Tons/year (short tons) of Nitrous Oxide (N₂O) Tons/year (short tons) of Perfluorocarbons (PECs) 	
•Tons/year (short tons) of Perfluorocarbons (PFCs)	
 Tons/year (short tons) of Perfluorocarbons (PFCs) Tons/year (short tons) of Sulfur Hexafluoride (SF₆) 	
•Tons/year (short tons) of Perfluorocarbons (PFCs)	

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?	☐Yes № No
If Yes:	
<i>i</i> . Estimate methane generation in tons/year (metric):	
<i>ii</i> . Describe any methane capture, control or elimination measures included in project design (e.g., combustion to g	generate heat or
electricity, flaring):	
i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as	Yes No
quarry or landfill operations?	
If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):	
j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services?	☐Yes No
If Yes: 2020 TRAFFIC STUDY FINDS N	IO SIGNIFICANT
<i>i</i> . When is the peak traffic expected (Check all that apply): Morning CHANGE IN LEVELS OF SERVI	
\square Randomly between hours of to .	
<i>ii.</i> For commercial activities only, projected number of semi-trailer truck trips/day:	
<i>iii.</i> Parking spaces: Existing Proposed Net increase/decrease	
iv. Does the proposed action include any shared use parking?	∐Yes∐No
v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing	access, describe:
<i>vi.</i> Are public/private transportation service(s) or facilities available within ¹ / ₂ mile of the proposed site?	☐Yes No
<i>vii</i> Will the proposed action include access to public transportation or accommodations for use of hybrid, electric	
or other alternative fueled vehicles?	
viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing	☐Yes ☐No
pedestrian or bicycle routes?	
$1 W' H \downarrow $	
k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand	□Yes□No
for energy? If Yes:	
<i>i</i> . Estimate annual electricity demand during operation of the proposed action:	
". Estimate annual electricity demand during operation of the proposed denon.	
<i>ii.</i> Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/	local utility, or
other):	5,
·	
<i>iii.</i> Will the proposed action require a new, or an upgrade to, an existing substation?	☐Yes No
1. Hours of operation. Answer all items which apply.	
<i>i</i> . During Construction: <i>ii</i> . During Operations:	
Monday - Friday:7:00 AM - 6:00 PM Monday - Friday:Typically 7:30 AM - 6:00 PM	
Saturday:	
Sunday:NONE Sunday:Typically Closed	
Holidays: NONE Holidays: Typically Closed	d

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction,	✓ Yes □No
operation, or both?	
If yes:	
<i>i.</i> Provide details including sources, time of day and duration: DURING CONSTRUCTION THE NOISE LEVELS MAY PERIODICALLY BE HIGHER THAN AMBIENT LEVELS	
<i>ii.</i> Will proposed action remove existing natural barriers that could act as a noise barrier or screen?	☐ Yes 2 No
Describe:	
n Will the proposed action have outdoor lighting?	✓ Yes □No
If yes:	
<i>i</i> . Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	
AROUND THE EXTERIOR FACADE OF BUILDING AT ENTRY POINTS, THESE FIXTURES WILL BE APPROXIMATELY 6' HT. AI THERE WILL BE BOLLARD LIGHTING ON THE WALKS AND POLE LIGHTING, APPROXIMATELY 14' AROUND THE ASPHALT	
<i>ii.</i> Will proposed action remove existing natural barriers that could act as a light barrier or screen? Describe:	\Box Yes \blacksquare No
Describe	
o. Does the proposed action have the potential to produce odors for more than one hour per day?	☐ Yes ☑ No
If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest	
occupied structures:	
p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons)	🗌 Yes 🗹 No
or chemical products 185 gallons in above ground storage or any amount in underground storage?	
If Yes:	
<i>i</i> . Product(s) to be stored	
<i>iii.</i> Generally describe proposed storage facilities:	
q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides,	☐ Yes ☑ No
insecticides) during construction or operation?	
If Yes:	
<i>i</i> . Describe proposed treatment(s):	
<i>ii.</i> Will the proposed action use Integrated Pest Management Practices?	□ Yes □No
r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal	$\square Yes \square No$
of solid waste (excluding hazardous materials)?	
If Yes:	
<i>i</i> . Describe any solid waste(s) to be generated during construction or operation of the facility:	
Construction: tons per (unit of time)	
Operation : tons per (unit of time)	
ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waster	:
Construction:	
Operation:	
iii. Proposed disposed methods/facilities for solid waste generated on site:	
 <i>iii.</i> Proposed disposal methods/facilities for solid waste generated on-site: Construction: 	
• Construction:	
Operation:	
L	

s. Does the proposed action include construction or modif	ication of a solid waste ma	anagement facility?	🗌 Yes 🗹 No	
If Yes:				
<i>i</i> . Type of management or handling of waste proposed f			g, landfill, or	
other disposal activities):				
Tons/month, if transfer or other non-co	ombustion/thermal treatme	ent. or		
Tons/hour, if combustion or thermal tr				
iii. If landfill, anticipated site life:	years			
t. Will proposed action at the site involve the commercial	generation, treatment, stor	rage, or disposal of hazardous	Yes No	
waste?	-			
If Yes:				
<i>i</i> . Name(s) of all hazardous wastes or constituents to be	generated, handled or man	naged at facility:		
<i>ii.</i> Generally describe processes or activities involving ha	azardous wastes or constitu	uents:		
<i>iii.</i> Specify amount to be handled or generated to	ns/month			
<i>iv.</i> Describe any proposals for on-site minimization, recy		is constituents:		
v. Will any hazardous wastes be disposed at an existing	offeita hazardaye wasta fa	oility?	Yes No	
If Yes: provide name and location of facility:				
;;;				
If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:				
E. Site and Setting of Proposed Action				
E.1. Land uses on and surrounding the project site				
a. Existing land uses. <i>i</i> . Check all uses that occur on, adjoining and near the p	project site			
\Box Urban \Box Industrial \Box Commercial \blacksquare Reside	ential (suburban) \Box Ru	ral (non-farm)		
	(specify): EDUCATIONAL			
<i>ii.</i> If mix of uses, generally describe:				
			······	
b. Land uses and covertypes on the project site.

c. Is the project site presently used by members of the community for public recreation? <i>i</i> . If Yes: explain: INCIDENTAL USE OF PLAYGROUND AND BALLFIELD	✓ Yes□No
 d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? If Yes, <i>i</i>. Identify Facilities: <u>THE SITE IS A SCHOOL.</u> 	✔ Yes No
- Desethe maintait state and in an existing dam?	Yes No
e. Does the project site contain an existing dam?If Yes:<i>i</i>. Dimensions of the dam and impoundment:	
• Dam height: feet	
Dam length: feet	
• Surface area: acres	
Volume impounded: gallons OR acre-feet	
<i>ii.</i> Dam's existing hazard classification:	
<i>iii.</i> Provide date and summarize results of last inspection:	
f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility.	☐Yes ✔No lity?
If Yes: <i>i</i> . Has the facility been formally closed?	□Yes□ No
If yes, cite sources/documentation:	
<i>ii.</i> Describe the location of the project site relative to the boundaries of the solid waste management facility:	
<i>u</i> . Describe the location of the project site relative to the boundaries of the solid waste management facinity.	
<i>iii</i> . Describe any development constraints due to the prior solid waste activities:	
 g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? If Yes: 	☐ Yes ⁄ No
<i>i</i> . Describe waste(s) handled and waste management activities, including approximate time when activities occurrent	ed:
 h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? If Yes: 	∐Yes ✔ No
<i>i.</i> Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply:	☐ Yes ☐ No
Yes – Spills Incidents database Provide DEC ID number(s):	
Yes – Environmental Site Remediation database Provide DEC ID number(s):	
□ Neither database	
<i>ii</i> . If site has been subject of RCRA corrective activities, describe control measures:	
<i>iii.</i> Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? If yes, provide DEC ID number(s):	☐ Yes 2 No
<i>iv.</i> If yes to (i), (ii) or (iii) above, describe current status of site(s):	

v. Is the project site subject to an institutional control limiting property uses?	☐ Yes ✓ No
 If yes, DEC site ID number:	
Describe any use limitations:	
 Describe any engineering controls:	☐ Yes ☐No
-	
E.2. Natural Resources On or Near Project Site	
a. What is the average depth to bedrock on the project site? VARIES 5' TO >26' feet	
b. Are there bedrock outcroppings on the project site?	☐ Yes ∠ No
If Yes, what proportion of the site is comprised of bedrock outcroppings?%	
c. Predominant soil type(s) present on project site: URBAN SOILS W SAND & SILT	
%	
d. What is the average depth to the water table on the project site? Average:20 feet	
e. Drainage status of project site soils: Well Drained: Month of site	
 ☐ Moderately Well Drained:% of site ☐ Poorly Drained% of site 	
f. Approximate proportion of proposed action site with slopes: 2 0-10%:% of site	
$\boxed{10-15\%:} \qquad \underline{10}\% \text{ of site}$ $\boxed{15\% \text{ or greater:}} \qquad \underline{20}\% \text{ of site}$	
g. Are there any unique geologic features on the project site?	☐ Yes ✔No
If Yes, describe:	
h. Surface water features.	
<i>i</i> . Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)?	☐Yes I No
<i>ii.</i> Do any wetlands or other waterbodies adjoin the project site?	□Yes∎No
If Yes to either <i>i</i> or <i>ii</i> , continue. If No, skip to E.2.i. <i>iii</i> . Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal,	☐ Yes ☑ No
state or local agency?	
 <i>iv.</i> For each identified regulated wetland and waterbody on the project site, provide the following information: Streams: Name Classification 	
• Lakes or Ponds: Name Classification	
 Wetlands: Name Approximate Size Wetland No. (if regulated by DEC) 	
<i>v</i> . Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies?	Yes 🖉 No
If yes, name of impaired water body/bodies and basis for listing as impaired:	
i. Is the project site in a designated Floodway?	Yes No
j. Is the project site in the 100 year Floodplain?	Yes No
k. Is the project site in the 500 year Floodplain?	Yes No
 I. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? 	☐ Yes ∠ No
If Yes:	□ 1 C2 1 100
<i>i</i> . Name of aquifer:	

m. Identify the predominant wildlife species that occupy or use the project site:	
 n. Does the project site contain a designated significant natural community? If Yes: <i>i</i>. Describe the habitat/community (composition, function, and basis for designation): 	Yes No
 <i>ii.</i> Source(s) of description or evaluation:	
o. Does project site contain any species of plant or animal that is listed by the federal government or NYS endangered or threatened, or does it contain any areas identified as habitat for an endangered or threaten	
p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species special concern?	of Yes No
q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? If yes, give a brief description of how the proposed action may affect that use:	☐Yes ⊠ No
E.3. Designated Public Resources On or Near Project Site	
 a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? If Yes, provide county plus district name/number:	∐ Yes ∠ No
b. Are agricultural lands consisting of highly productive soils present? <i>i.</i> If Yes: acreage(s) on project site? <i>ii.</i> Source(s) of soil rating(s):	
 c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? If Yes: i. Nature of the natural landmark: ii. Biological Community iii. Geological Feature iii. Provide brief description of landmark, including values behind designation and approximate size/exter 	□Yes ∨ No
d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? If Yes: i. CEA name: ii. Basis for designation: iii. Designating agency and date:	
0 ··· 0 ·0· · j ·· · · ····	

 e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on, or has been nominated by the NYS Board of Historic Preservation for inclusion on, the State or National Register of Historic Places? If Yes: i. Nature of historic/archaeological resource: Archaeological Site 	☐ Yes ☑ No
<i>iii.</i> Brief description of attributes on which listing is based:	
f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory?	✔ Yes □No
 g. Have additional archaeological or historic site(s) or resources been identified on the project site? If Yes: <i>i</i>. Describe possible resource(s): <i>ii</i>. Basis for identification: 	Yes No
 h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? If Yes: i. Identify resource: OLD CROTON AQUEDUCT STATE HISTORIC PARK 	Yes No
<i>ii.</i> Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or etc.): <u>STATE HISTORIC TRAIL</u>	scenic byway,
<i>iii.</i> Distance between project and resource:2.61 miles.	
 i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? If Yes: i. Identify the name of the river and its designation: 	☐ Yes Ø No
ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666?	☐ Yes ☐No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

I

G. Verification

I certify that the information provided is true to the best of my knowledge.

Full Environmental Assessment FormPart 2 - Identification of Potential Project Impacts

Project : Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

1. Impact on Land

L.	Impact on Land			
	Proposed action may involve construction on, or physical alteration of,	🗆 NO		YES
	the land surface of the proposed site. (See Part 1. D.1)			
	If "Yes", answer questions a - j. If "No", move on to Section 2.			
		Delevent	No or	Madanata

	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may involve construction on land where depth to water table is less than 3 feet.	E2d		
b. The proposed action may involve construction on slopes of 15% or greater.	E2f		
c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.	E2a		
d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.	D2a		
e. The proposed action may involve construction that continues for more than one year or in multiple phases.	D1e		
f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).	D2e, D2q		
g. The proposed action is, or may be, located within a Coastal Erosion hazard area.	Bli		
h. Other impacts:			

The proposed action may result in the modification or destruction of, or inhib access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g) <i>If "Yes", answer questions a - c. If "No", move on to Section 3.</i>	□ NO		YES
ij ies , unswer questions a c. ij ivo , move on to section 5.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Identify the specific land form(s) attached:	E2g		
 b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark. Specific feature:	E3c		
c. Other impacts:			
 3. Impacts on Surface Water The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h) If "Yes", answer questions a - l. If "No", move on to Section 4. 	□ NC		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may create a new water body.	D2b, D1h		
b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.	D2b		
c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.	D2a		
d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.	E2h		
e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.	D2a, D2h		
f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.	D2c		
g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).	D2d		
h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.	D2e		
i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.	E2h		
j. The proposed action may involve the application of pesticides or herbicides in or around any water body.	D2q, E2h		
k. The proposed action may require the construction of new, or expansion of existing,	D1a, D2d		

1. Other impacts:				
 4. Impact on groundwater The proposed action may result in new or additional use of ground water, or □ NO □ YES may have the potential to introduce contaminants to ground water or an aquifer. (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5.				
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur	
a. The proposed action may require new water supply wells, or create additional demand on supplies from existing water supply wells.	D2c			
b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer. Cite Source:	D2c			
c. The proposed action may allow or result in residential uses in areas without water and sewer services.	D1a, D2c			
d. The proposed action may include or require wastewater discharged to groundwater.	D2d, E21			
e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.	D2c, E1f, E1g, E1h			
f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.	D2p, E2l			
g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.	E2h, D2q, E2l, D2c			
h. Other impacts:				

 5. Impact on Flooding The proposed action may result in development on lands subject to flooding. (See Part 1. E.2) If "Yes", answer questions a - g. If "No", move on to Section 6. 	□ NO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in development in a designated floodway.	E2i		
b. The proposed action may result in development within a 100 year floodplain.	E2j		
c. The proposed action may result in development within a 500 year floodplain.	E2k		
d. The proposed action may result in, or require, modification of existing drainage patterns.	D2b, D2e		
e. The proposed action may change flood water flows that contribute to flooding.	D2b, E2i, E2j, E2k		
f. If there is a dam located on the site of the proposed action, is the dam in need of repair, or upgrade?	E1e		

g. Other impacts:			
 6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D.2.h, D.2.g) If "Yes", answer questions a - f. If "No", move on to Section 7. 	□ NO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
 a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: More than 1000 tons/year of carbon dioxide (CO₂) More than 3.5 tons/year of nitrous oxide (N₂O) More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs) More than .045 tons/year of sulfur hexafluoride (SF₆) More than 1000 tons/year of carbon dioxide equivalent of hydrochloroflourocarbons (HFCs) emissions vi. 43 tons/year or more of methane 	D2g D2g D2g D2g D2g D2g D2g		
b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous air pollutants.	D2g		
c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.	D2f, D2g		
d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.	D2g		
e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.	D2s		
f. Other impacts:			

7. Impact on Plants and Animals The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. 1 If "Yes", answer questions a - j. If "No", move on to Section 8.	mq.)	□ NO	□ YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may cause reduction in population or loss of individuals of any threatened or endangered species, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2o		
b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.	E2o		
c. The proposed action may cause reduction in population, or loss of individuals, of any species of special concern or conservation need, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2p		
d. The proposed action may result in a reduction or degradation of any habitat used by any species of special concern and conservation need, as listed by New York State or the Federal government.	E2p		

e. The proposed action may diminish the capacity of a registered National Natural Landmark to support the biological community it was established to protect.	E3c	
f. The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community. Source:	E2n	
g. The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.	E2m	
h. The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat. Habitat type & information source:	E1b	
i. Proposed action (commercial, industrial or recreational projects, only) involves use of herbicides or pesticides.	D2q	
j. Other impacts:		

8. Impact on Agricultural Resources The proposed action may impact agricultural resources. (See Part 1. E.3.a. a If "Yes", answer questions a - h. If "No", move on to Section 9.	and b.)	□ NO	□ YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
 a. The proposed action may impact soil classified within soil group 1 through 4 of the NYS Land Classification System. 	E2c, E3b		
b. The proposed action may sever, cross or otherwise limit access to agricultural land (includes cropland, hayfields, pasture, vineyard, orchard, etc).	E1a, Elb		
c. The proposed action may result in the excavation or compaction of the soil profile of active agricultural land.	E3b		
d. The proposed action may irreversibly convert agricultural land to non-agricultural uses, either more than 2.5 acres if located in an Agricultural District, or more than 10 acres if not within an Agricultural District.	E1b, E3a		
e. The proposed action may disrupt or prevent installation of an agricultural land management system.	El a, E1b		
f. The proposed action may result, directly or indirectly, in increased development potential or pressure on farmland.	C2c, C3, D2c, D2d		
g. The proposed project is not consistent with the adopted municipal Farmland Protection Plan.	C2c		
h. Other impacts:			

If "Yes", answer questions a - g. If "No", go to Section 10.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Proposed action may be visible from any officially designated federal, state, or local scenic or aesthetic resource.	E3h		
b. The proposed action may result in the obstruction, elimination or significant screening of one or more officially designated scenic views.	E3h, C2b		
c. The proposed action may be visible from publicly accessible vantage points:i. Seasonally (e.g., screened by summer foliage, but visible during other seasons)ii. Year round	E3h		
d. The situation or activity in which viewers are engaged while viewing the proposed action is:i. Routine travel by residents, including travel to and from work ii. Recreational or tourism based activities	E3h E2q, E1c		
e. The proposed action may cause a diminishment of the public enjoyment and appreciation of the designated aesthetic resource.	E3h		
 f. There are similar projects visible within the following distance of the proposed project: 0-1/2 mile ½ -3 mile 3-5 mile 5+ mile 	D1a, E1a, D1f, D1g		
g. Other impacts:			

	Part I Question(s)	small impact	to large impact may
		may occur	occur
a. The proposed action may occur wholly or partially within, or substantially contiguous to, any buildings, archaeological site or district which is listed on the National or State Register of Historical Places, or that has been determined by the Commissioner	E3e		
of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places.			
b. The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.	E3f		
c. The proposed action may occur wholly or partially within, or substantially contiguous to, an archaeological site not included on the NY SHPO inventory. Source:	E3g		

d. Other impacts:			
If any of the above (a-d) are answered "Moderate to large impact may e. occur", continue with the following questions to help support conclusions in Part 3:			
i. The proposed action may result in the destruction or alteration of all or part of the site or property.	E3e, E3g, E3f		
ii. The proposed action may result in the alteration of the property's setting or integrity.	E3e, E3f, E3g, E1a, E1b		
iii. The proposed action may result in the introduction of visual elements which are out of character with the site or property, or may alter its setting.	E3e, E3f, E3g, E3h, C2, C3		
 11. Impact on Open Space and Recreation The proposed action may result in a loss of recreational opportunities or a reduction of an open space resource as designated in any adopted municipal open space plan. (See Part 1. C.2.c, E.1.c., E.2.q.) If "Yes", answer questions a - e. If "No", go to Section 12.			YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in an impairment of natural functions, or "ecosystem services", provided by an undeveloped area, including but not limited to stormwater storage, nutrient cycling, wildlife habitat.	D2e, E1b E2h, E2m, E2o, E2n, E2p		
b. The proposed action may result in the loss of a current or future recreational resource.	C2a, E1c, C2c, E2q		
c. The proposed action may eliminate open space or recreational resource in an area with few such resources.	C2a, C2c E1c, E2q		
d. The proposed action may result in loss of an area now used informally by the community as an open space resource.	C2c, E1c		
e. Other impacts:			
 12. Impact on Critical Environmental Areas The proposed action may be located within or adjacent to a critical environmental area (CEA). (See Part 1. E.3.d) If "Yes", answer questions a - c. If "No", go to Section 13.			YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in a reduction in the quantity of the resource or characteristic which was the basis for designation of the CEA.	E3d		
 a. The proposed action may result in a reduction in the quantity of the resource or characteristic which was the basis for designation of the CEA. b. The proposed action may result in a reduction in the quality of the resource or characteristic which was the basis for designation of the CEA. 	E3d E3d		

13. Impact on Transportation The proposed action may result in a change to existing transportation systems	. 🗆 N(YES
(See Part 1. D.2.j)			115
If "Yes", answer questions a - f. If "No", go to Section 14.	Relevant Part I Question(s)	No, or small impact	Moderate to large impact may
a. Projected traffic increase may exceed capacity of existing road network.	D2j	may occur	occur
b. The proposed action may result in the construction of paved parking area for 500 or more vehicles.	D2j		
c. The proposed action will degrade existing transit access.	D2j		
d. The proposed action will degrade existing pedestrian or bicycle accommodations.	D2j		
e. The proposed action may alter the present pattern of movement of people or goods.	D2j		
f. Other impacts:			
14. Impact on Energy The proposed action may cause an increase in the use of any form of energy. (See Part 1. D.2.k)			YES
If "Yes", answer questions a - e. If "No", go to Section 15.	Relevant	No, or	Moderate
	Part I Question(s)	small impact may occur	to large impact may occur
a. The proposed action will require a new, or an upgrade to an existing, substation.	D2k		
b. The proposed action will require the creation or extension of an energy transmission or supply system to serve more than 50 single or two-family residences or to serve a commercial or industrial use.	D1f, D1q, D2k		
c. The proposed action may utilize more than 2,500 MWhrs per year of electricity.	D2k		
d. The proposed action may involve heating and/or cooling of more than 100,000 square feet of building area when completed.	D1g		
e. Other Impacts:			
15. Impact on Noise, Odor, and Light The proposed action may result in an increase in noise, odors, or outdoor ligh	ting. 🗆 NC		YES
(See Part 1. D.2.m., n., and o.) If "Yes", answer questions a - f. If "No", go to Section 16.			
(See Part 1. D.2.m., n., and o.) If "Yes", answer questions a - f. If "No", go to Section 16.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
	Part I	small impact	to large impact may
If "Yes", answer questions a - f. If "No", go to Section 16. a. The proposed action may produce sound above noise levels established by local	Part I Question(s)	small impact may occur	to large impact may occur

d. The proposed action may result in light shining onto adjoining properties.	D2n	
e. The proposed action may result in lighting creating sky-glow brighter than existing area conditions.	D2n, E1a	
f. Other impacts:		

16. Impact on Human Health The proposed action may have an impact on human health from exposure to new or existing sources of contaminants. (See Part 1.D.2.q., E.1. d. f. g. ar <i>If "Yes", answer questions a - m. If "No", go to Section 17.</i>	□ No nd h.)	0 🛛	YES
	Relevant Part I Question(s)	No,or small impact may cccur	Moderate to large impact may occur
a. The proposed action is located within 1500 feet of a school, hospital, licensed day care center, group home, nursing home or retirement community.	E1d		
b. The site of the proposed action is currently undergoing remediation.	E1g, E1h		
c. There is a completed emergency spill remediation, or a completed environmental site remediation on, or adjacent to, the site of the proposed action.	E1g, E1h		
d. The site of the action is subject to an institutional control limiting the use of the property (e.g., easement or deed restriction).	E1g, E1h		
e. The proposed action may affect institutional control measures that were put in place to ensure that the site remains protective of the environment and human health.	E1g, E1h		
f. The proposed action has adequate control measures in place to ensure that future generation, treatment and/or disposal of hazardous wastes will be protective of the environment and human health.	D2t		
g. The proposed action involves construction or modification of a solid waste management facility.	D2q, E1f		
h. The proposed action may result in the unearthing of solid or hazardous waste.	D2q, E1f		
i. The proposed action may result in an increase in the rate of disposal, or processing, of solid waste.	D2r, D2s		
j. The proposed action may result in excavation or other disturbance within 2000 feet of a site used for the disposal of solid or hazardous waste.	E1f, E1g E1h		
k. The proposed action may result in the migration of explosive gases from a landfill site to adjacent off site structures.	E1f, E1g		
1. The proposed action may result in the release of contaminated leachate from the project site.	D2s, E1f, D2r		
m. Other impacts:			

17. Consistency with Community Plans			
The proposed action is not consistent with adopted land use plans. (See Part 1. C.1, C.2. and C.3.)	□ NO	י ם	YES
If "Yes", answer questions a - h. If "No", go to Section 18.			
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action's land use components may be different from, or in sharp contrast to, current surrounding land use pattern(s).	C2, C3, D1a E1a, E1b		
b. The proposed action will cause the permanent population of the city, town or village in which the project is located to grow by more than 5%.	C2		
c. The proposed action is inconsistent with local land use plans or zoning regulations.	C2, C2, C3		
d. The proposed action is inconsistent with any County plans, or other regional land use plans.	C2, C2		
e. The proposed action may cause a change in the density of development that is not supported by existing infrastructure or is distant from existing infrastructure.	C3, D1c, D1d, D1f, D1d, Elb		
f. The proposed action is located in an area characterized by low density development that will require new or expanded public infrastructure.	C4, D2c, D2d D2j		
g. The proposed action may induce secondary development impacts (e.g., residential or commercial development not included in the proposed action)	C2a		
h. Other:			
18. Consistency with Community Character The proposed project is inconsistent with the existing community character. (See Part 1. C.2, C.3, D.2, E.3)	□ NO	р — П.У.	YES
The proposed project is inconsistent with the existing community character.	□ NO Relevant Part I Question(s)	No, or small impact may occur	YES Moderate to large impact may occur

Evaluation of the Magnitude and Importance of Project Impacts

Kahlil Gibran PS28

The SEQRA Environmental Assessment Form (EAF) examines the potential environmental effects that may result from the building renovations and additions and associated sitework at the existing Kahlil Gibran public Pre-K to 8th grade school.

The scope of the Proposed Action as relates to site development generally involves demolition of a "modular" classroom building, several sidewalks and pavement areas for the construction of a building addition, associated walkways and playground, added parking and reconstruction of a ballfield. Project will include underground stormwater management systems to accommodate new impervious surfaces.

The Full Environmental Assessment includes Part 1 and Part 2 forms. The following narratives provide further evaluations of areas identified in the forms or otherwise of potential concern for this action.

A note with regard to a specific item cited in the EAF Mapper Summary Report: E.3.f. The NYSDEC EAF Mapper indicates the project site may be located in an area sensitive for archaeological sites that are identified in the State's archaeological site inventory. In its review of this action, however, the Office of Parks, Recreation and Historic Preservation concluded that the project would have no impact on archaeological or historic resources. (OPRHP letter dated December 27, 2017.)

IMPACT ON LAND

Existing Conditions

The soils, topography and geological features are generally defined by the native soil characteristics, although prior development of this site has undoubtedly altered these characteristics. Soils in the county have been mapped by the US Department of Agriculture Natural Resources Conservation Service (NRCS; formerly Soil Conservation Service, SCS) for agricultural and land planning purposes.¹

The total area of the site is approximately 5.94 acres. Natural soils are mapped as Urban land-Paxton complex (UpB) soil type. This is an upland, well drained soil, Borings taken on the site in 2017 and 2020 did not encounter groundwater or bedrock within 12 depth, or greater, in the construction area. Topography of the site is variable – on average, 3 to 8 percent slopes.

This land is not known to have any significant or unique natural land features. The entire property has experienced prior disturbance associated with urban development.

¹USDA SCS Soil Survey of Westchester County, New York. Digitized soil survey information is available at websoilsurvey.nrcs.usda.gov.

Evaluation of the Magnitude and Importance of Project Impacts

Kahlil Gibran PS28

Minimization or Avoidance of Potential Impacts

The proposed building is situated in an area of steeper slopes which will require careful management to avoid excessive erosion from the construction area. Implementation of conventional erosion/sedimentation control practices in accordance with NY State stormwater management regulations and standards will be required to minimize soil loss.

Borings taken on the site reveal that sufficient soil depth exists in areas of proposed construction so there does not appear to be a need to employ bedrock removal techniques. Some boulders were encountered which may require excavation and removal from the site.

There are no significant cumulative impacts anticipated with regard to land resources from this expansion of the current use.

IMPACT ON WATER RESOURCES

Existing Conditions

There are no mapped streams or wetlands in the immediate project area, nor is the area subject to flooding. Stormwater runoff from the developed areas is generally collected in the street storm drain system. The project site is located on a N/S trending ridgeline that drains generally to the west, ultimately draining to the Bronx River.

Properties in the project area are located within an existing service area of municipal sewer and water services. The local area development does not rely on groundwater wells for a water supply.

Minimization or Avoidance of Potential Impacts

There are no natural surface water resources near the site which could receive sediment carried by runoff from the site. However, to protect the manmade drainage systems that collect and carry runoff from the site area, implementation of conventional erosion/sedimentation control practices in accordance with NY State stormwater management regulations and standards will be required to minimize downstream sedimentation.

The proposed project will increase the areal extent of impervious surface on the property, potentially impacting surface runoff. Stormwater management practices for the project will include underground treatment systems designed to moderate the quality and quantity water runoff from impervious surfaces.

Evaluation of the Magnitude and Importance of Project Impacts

Kahlil Gibran PS28

IMPACT ON TRANSPORTATION

Existing Conditions

A traffic and parking study² was conducted in early 2020 including existing traffic counts and turning movement evaluations at five local area intersections through which traffic to and from the school travel. Three study intersections were on Underhill Street south of the school site including the signalized intersection at Underhill and Central Park Avenue. Additionally, two local street intersections north and west of the school were evaluated. The study intersections were:

- Underhill Street and Rosedale Road
- Underhill Street and Grandview Boulevard
- Underhill Street and Central Park Avenue
- Rosedale Road and Melrose Avenue
- Grandview Boulevard and Manor Drive

Peak activity related to the school occurs on weekdays between the hours of 8:00 and 9:00 AM and 2:45 to 3:45 PM during the school year. In addition to traffic counts, the study included observations of vehicle queueing, school bus and parent vehicle numbers and time frames for drop-off and pick-up, and staff parking counts. The study reviewed the existing arrival-departure pattern on the roadway system to project the effects of anticipated traffic after the expansion project is completed.

The study provided a projection of future "No Build" (background) traffic for the anticipated build year (2022) upon which the future project-generated traffic could be applied and compared.

Minimization or Avoidance of Potential Impacts

The study provided a projection of future "Build" traffic for the build year after the expansion project is completed. The proposed project will cause an incremental increase in the volume of local area traffic and need for parking. The results of the detailed analysis indicate that the proposed expansion would not have a significant adverse impact on traffic conditions in the surrounding neighborhood and that with improvements, would provide adequate parking on the site to accommodate the use. The traffic operating conditions at all study intersections were projected to remain virtually the same as the existing condition.

IMPACT ON NOISE & AIR QUALITY (CONSTRUCTION IMPACTS)

Existing Conditions

Land use in the immediate project vicinity is predominantly single-family residential. The level of ambient noise in the project area is expected to be typical for an urban locale, with the principal source of noise typically being vehicle traffic on nearby roads, particularly Central Park Avenue. Likewise, ambient air quality levels are expected to be within acceptable regulatory limits in the

² Traffic letter report to KG+D Architects by Adler Consulting, draft dated March 3, 2020.

Evaluation of the Magnitude and Importance of Project Impacts

Kahlil Gibran PS28

project area. There are no identified stationary generators of noise or adverse air emissions in the project vicinity.

Minimization or Avoidance of Potential Impacts

The Proposed Action will likely cause temporary, periodic increases in ambient noise levels and air quality reductions while construction operations for the building and sitework are going on. Operation of construction equipment and truck traffic for delivering materials may cause noise and raise dust in the immediate area of operations. Common measures taken to minimize such effects include maintaining noise-control fixtures on construction equipment (for example, proper mufflers), turning off unused equipment and limiting machine operation to necessary activities, and applying water to surfaces where equipment is operated to minimize dust.

No significant cumulative impacts are anticipated with regard to noise and air quality from this expansion of the existing use.

Potential construction-related impacts will be of short duration and limited in areal extent and will end upon the conclusion of construction.
