Re: SEQRA Action related to Additions and Alterations at Kahlil Gibran School 28

Greetings:

The accompanying Full Environmental Assessment Form (EAF), Parts 1, 2 and 3 enclosed, has been updated for the current project scope at Kahlil Gibran School. The prior EAF (for the 2017 scope) was circulated with a Notice of Intent to be SEQR Lead Agency to potential involved agencies to initiate the State Environmental Quality Review (SEQR) process. The Board of Education assumed lead agency status following that circulation.

The updated environmental assessment provides substantiation that the current scope can be considered to result in no significant adverse impact accounting for the procedures that are incorporated into the project that would minimize its potential impacts. This is an Unlisted Action under SEQR and it is our opinion that based upon the EAF a Determination of Non-Significance (Negative Declaration) can be issued.

Please call if you have any questions or concerns.

Sincerely,

KAEYER, GARMENT + DAVIDSON ARCHITECTS, PC
