This is a one year requirements contract for licensed plumbing services under a time and materials basis for the conversion of select schools from fuel oil to natural gas.

This was publically bid per NYSGML 103 and awarded to Markley Mechanical via Board Resolution 16.8 on March 22, 2018 and the BOCS on April 5, 2018. The contract specifications provide for annual extension by the mutual consent of both parties under the same terms and conditions of the original contract for up to two additional years and is hereby being extended for the first time.

Rationale:

As of the termination date of year one, roughly \$150,000 has been expensed. Second year efforts may be higher as long term plans are permitted by Con Ed.

The contractor will be performing all of the logistical paperwork and plumbing construction requirements of Con Ed. The contractor will also be assisting the District in determining which schools can be converted most efficiently with the District's consulting engineers.
